

# VMBO-groen

VMBO-groen offers its pupils, who have completed primary school, a preparatory secondary vocational education (VMBO) in Buitenpost, Heerenveen, Leeuwarden and Sneek.

## Our vision

### Meaningful education

Our schooling is geared towards the gaining of experience, which we offer in a practical way. Learning takes place with head, heart and hands.

### Active & independent

Our way of schooling is focused on an active and independent way of learning. Learning in context & together with others. When several courses within a learning sector are merged, a certain connection is made. When pupils work together, they discover that they can help and learn from each other this way.

### Safe & challenging

In addition to a clean, inviting school with modern means of education and an abundance of computers, we would naturally like to be a safe school. We have clear rules and our staff knows its pupils and their background. We offer guidance adapted to our pupils' needs. In short, we offer a place where they can feel just at home!

### Our green environment

We don't call ourselves VMBO-green for no reason. Our pupils are taught using green assignments and general knowledge is offered in a green environment whenever possible.
